

Dear Representative,

In regards to NAB's petition 04-160, I would like to express my dissatisfaction with NAB's proposal. Restricting satellite radio's capability to broadcast local weather and traffic services is nothing more than a violation of free business and a protectionist policy statement against a well entrenched industry. Please do not continue our country's dangerous trend at stifling new innovations by succumbing to well funded lobbyist organizations.

Respectfully,

Joshua Cameron
